

5.2 Changelog

This page shows changes since 5.1.

Stories:

| Key | Summary | Component/s |
|-----------|---|---|
| EZP-18865 | Separate DFS binary & cache tables and make it configurable | Caching, Clustering |
| EZP-20039 | Automate install steps in composer post install/update | CI System, Install |
| EZP-20071 | HttpCache should Vary on the user hash | Symfony stack, Users and Access control |
| EZP-20461 | Finishing the implementation using Signal/Slot by enabling all Service integration tests | Search |
| EZP-20576 | As a developer, I want to avoid writing my pagelayout twice by using my Twig template pagelayout for legacy actions | Template language |
| EZP-20831 | Properly handle path to images variants in REST responses | Content (images, XML, PDF, RSS, etc.), REST API v2 |
| EZP-21019 | Upgrade to Symfony 2.3 | Symfony stack |
| EZP-21133 | POST /content/views has a wrong media-type | REST API v2 |
| EZP-21168 | Remove API InMemory (Stub) implementation and test suite | Test framework |
| EZP-21169 | As a Tester I want BDD running on Travis | Test framework |
| EZP-21176 | Prevent REST hrefs without prefix in payloads | Documentation, REST API v2 |
| EZP-21178 | Create documentation on how to listen to API signals | Repository & Services (Public API impl), Symfony stack |
| EZP-21180 | Write documentation on context aware HTTP caching | Caching, Symfony stack |
| EZP-21192 | Symfony 2.3 : Implement interactive management of the parameters.yml file | Symfony stack |
| EZP-21245 | Make it easier to register eZXML custom tags in main XSL stylesheet | Field types |
| EZP-21323 | Add link to older packages in setup wizard | Install |
| EZP-21461 | As a user I want all country names to be translated in all languages | Content (images, XML, PDF, RSS, etc.) |
| EZP-21526 | As a DemoBundle user I want to use disqus for commenting | DemoBundle |
| EZP-21531 | As a user I need a way to pick correct Content name language | DemoBundle, Symfony stack |
| EZP-21532 | As a DemoBundle user I want Blog and blog_post to be displayed using symfony stack | DemoBundle, Symfony stack |
| EZP-21654 | DemoBundle: refactor top menu controller | DemoBundle |
| EZP-21657 | DemoBundle: refactor latestContent action | DemoBundle |
| EZP-21676 | As a developer, I want to access a field value in the current locale in a Twig template | Symfony stack, Template language |
| EZP-21677 | As a developer, I want to always have access to root location | Symfony stack, Template language |
| EZP-21680 | As a developer, I want to easily check if a Field is empty | Repository & Services (Public API impl), Symfony stack, Template language |
| EZP-21723 | As a developer, I want to use PagerFanta to do my pagination | DemoBundle, Symfony stack |
| EZP-21743 | As a DemoBundle user, I want the homepage to be displayed using full new stack | DemoBundle |
| EZP-21816 | As a DemoBundle user, I want articles to be rendered with Twig templates | DemoBundle |
| EZP-21824 | Update the 5.2 release notes | Documentation |
| EZP-21844 | Write a cache cleanup script for the split DFS feature | Clustering, Upgrading |
| EZP-21868 | As a DemoBundle user, I want all frontpages to be implemented using Twig | DemoBundle |
| 31 issues | | |

Improvements:

| Key | Summary | Component/s |
|-----------|--|---|
| EZP-15040 | Support for more than 30 languages | Language |
| EZP-19120 | 5.x expose isEmptyValue() in API for template needs | Database related, Misc |
| EZP-20018 | Missing Language, Visibility & ObjectState Criteria | Legacy Storage engine, Public API interfaces, Repository & Services (Public API impl) |
| EZP-20069 | Expose SignalSlot repository properly | Repository & Services (Public API impl), Symfony stack |
| EZP-20223 | Implement missing integration tests for Repository | Repository & Services (Public API impl) |
| EZP-20261 | eZ Recommendation - on-the-fly scenario loading | Extensions/eZ Recommendation |
| EZP-20438 | Make it possible to use a custom controller to handle a content/location | Caching, Symfony stack, Template language |
| EZP-20502 | avoid Symfony exception when file is missing for ezimage attribute | Content (images, XML, PDF, RSS, etc.), Legacy IO, Repository & Services (Public API impl) |
| EZP-20638 | ContentStaging does not synchronize related objects | Extensions, Extensions/eZ Content Staging |
| EZP-20821 | Make it possible to configure the front controller without editing it | |
| EZP-20829 | Make the REST APILoaderFactory dynamic | REST API v2 |
| EZP-20837 | Improve unit test execution time by changing Repo test to use API/SetupFactory approach | CI System, Test framework |
| EZP-20849 | Move eZ Comments menu from top menu to left content menu | Administration Interface, Extensions/eZ Comments |
| EZP-20922 | Add event listener to kernel/content/download.php | Content (images, XML, PDF, RSS, etc.) |
| EZP-20936 | FieldType integration tests need to be updated with tests for updating Content on changing ContentType | Field types, Test framework |
| EZP-20959 | Add admin.ini LeftMenu Enabled setting | Administration Interface |
| EZP-20978 | Write unit tests for createContent() and updateContent() methods in the ContentService | Repository & Services (Public API impl) |
| EZP-20979 | Write integration tests for createContent() and updateContent() methods in the ContentService | Repository & Services (Public API impl) |
| EZP-21018 | Replace RMF Url management with Symfony's | REST API v2 |
| EZP-21035 | User can not be properly created from inside storage | Legacy Storage engine |
| EZP-21064 | Add module_result in a LegacyResponse call | Symfony stack |
| EZP-21095 | Allow retrieving users by login & email through the User Service | Public API interfaces, Repository & Services (Public API impl) |
| EZP-21143 | performance: do not run legacy pagelayout when using an eZ5 one | |
| EZP-21240 | unpublish cronjob calls activateextensions() while this is already done by runcronjobs.php | |
| EZP-21292 | Missing API Depth Criterion | Public API interfaces, Repository & Services (Public API impl) |
| EZP-21293 | 404 errors within the REST prefix should be valid REST 404 | REST API v2 |
| EZP-21296 | Logs don't need to be versionned | GIT |
| EZP-21321 | Extend eZpublish/console cache:clear | Caching, Symfony stack |
| EZP-21337 | Return correct HTTP code for access denied page | Misc |
| EZP-21350 | Support pre_rendering event in content/view | Misc |
| EZP-21385 | Make redirection after publish configurable | Administration Interface |
| EZP-21495 | (Persistence) cache does not support multi repository setup | Caching, Symfony stack |
| EZP-21501 | Support object state group limitation in API | Repository & Services (Public API impl) |
| EZP-21510 | 'Clear View cache from here' action ignores CacheThreshold setting, | Caching, Legacy Storage engine |

performance issues/db deadlocks

| | | |
|-----------|---|--|
| EZP-21525 | Allow multisite with different rootLocationId | DemoBundle |
| EZP-21640 | Implement RelationList search criterion | Public API interfaces, Repository & Services (Public API impl), Search |
| EZP-21701 | ez_render_field should be able to use current template as parameter | Symfony stack, Template language |
| EZP-21719 | Implement LocationDepth search criterion | Public API interfaces, Search |
| EZP-21733 | Improve exceptions thrown in RoleService | Public API interfaces, Repository & Services (Public API impl) |
| EZP-21793 | Add \$matchAlwaysAvailable parameter to LanguageCriterion | Public API interfaces, Search |
| EZP-21865 | Add showInfo parameter for ezgmaplocation field type base template | Design (templates, CSS, etc.) |
| EZP-21881 | Update info banner on doc.ez.no | Documentation |
| EZP-22146 | roles applied to many users cause fatal errors | Legacy Storage engine, Permissions |

43 issues

Bugs:

| Key | Summary | Component/s |
|-----------|---|--|
| EZP-18195 | \$result.object is not correctly created | Extensions/eZ Find, Extensions/eZ Find/Searching |
| EZP-19122 | Faulty embed-inline handling | Extensions/eZ Online Editor, Extensions/eZ Online Editor/Online Editor |
| EZP-19392 | clear cache doesn't remove translation list cache | Caching |
| EZP-19904 | Admin interface redirection to raw treemenu JSON output | Administration Interface, Extensions/eZ JSCore |
| EZP-19979 | Class on ezxml tags are (almost) not handled | Field types |
| EZP-20262 | Classes override issue caused by includes | Workflows |
| EZP-20311 | query parameters get lost when being redirected after login | Public API interfaces |
| EZP-20451 | block_view_gui for a manual fetched block don't use override templates | Extensions/eZ Flow |
| EZP-20482 | In IE8, "Enter" key does not work when creating a custom tag | Extensions/eZ Online Editor/Online Editor |
| EZP-20558 | Workflow Event/Approve not working correctly | Administration Interface |
| EZP-20575 | Setup wizard fails to generate yml config when using kickstart.ini | Documentation, Install |
| EZP-20588 | Initial export contains only one categorypath | Extensions/eZ Recommendation |
| EZP-20642 | Legacy_mode:true ignored inside a siteaccess configuration group | Misc |
| EZP-20657 | EmbedToHtml5 Converter doesn't define alignment parameters | Content (images, XML, PDF, RSS, etc.) |
| EZP-20676 | eZ OE: JS error inserting embed-inline tag on empty XML block | Extensions/eZ Online Editor |
| EZP-20752 | EzscriptMonitor - Monitor page is not updated | Extensions |
| EZP-20766 | Wrong default value for CLUSTER_HEADER_X_POWERED_BY in index_cluster.php | Clustering |
| EZP-20769 | REST v2: Reading object containing ezimage datatype returns hardcoded (and wrong) results | REST API v2 |
| EZP-20802 | auto-login after account activation does not increase the login count | Misc |
| EZP-20822 | API services phpdoc and input validation problems | Public API interfaces |
| EZP-20874 | ezsyz() operator bad behavior with the "querystring" parameter | Template language |
| EZP-20877 | Improve unit test code coverage of eZ\Publish\Core\SignalSlot | Repository & Services (Public API impl), Test framework |
| EZP-20880 | HttpCache purge is not being triggered when permissions change | Public API interfaces |

| | | |
|-----------|--|--|
| EZP-20890 | Headers overridden by LegacyKernelController | |
| EZP-20895 | Small Typo in eZContentOperationCollection::updatePriority phpdoc | Documentation |
| EZP-20943 | Regression caused by " Remove extraneous op_code handling in storing content relations" | Design (templates, CSS, etc.), Legacy Storage engine, Template language |
| EZP-20948 | Missing support for binary files URI | Public API interfaces |
| EZP-20950 | Legacy Storage ContentType ContentUpdater updates only current version | Legacy Storage engine |
| EZP-20952 | Creating content causes a memory leak using ezfind | Extensions/eZ Find, Public API interfaces, Repository & Services (Public API impl) |
| EZP-20955 | API: Issues with create permission with Section limitation | Permissions, Public API interfaces |
| EZP-20957 | Misplaced semicolon causes flow to break | Clustering |
| EZP-20968 | Broken navigation for REST documentation on GitHub | REST API v2 |
| EZP-20969 | REST v2 "Update location" request is not working as intended | REST API v2 |
| EZP-20982 | UriAlias matcher not working correctly | GIT, Symfony stack |
| EZP-20985 | excluded_uri_prefixes throwing 503 | Symfony stack |
| EZP-20987 | Notice preventing the completion of creating a FieldType draft with null fieldSettings | Repository & Services (Public API impl) |
| EZP-20988 | stale links using non-translatable attribute | Cronjobs, Database related |
| EZP-20992 | Wrong scope in contentViewGenerateError when using DFS and user-permissions | Caching, Clustering, Permissions |
| EZP-20993 | Document scenario list in ezrecommendation.ini | Documentation, Extensions/eZ Recommendation |
| EZP-20995 | content/edit_draft.tpl cannot be overridden by section | Design (templates, CSS, etc.), Template language |
| EZP-21004 | Error synchronizing content if language is not listed in target server's siteaccess | Extensions/eZ Content Staging |
| EZP-21005 | When changing siteaccess, the autosave's preview is not updated | Extensions/eZ Autosave |
| EZP-21006 | Setup wizard throws PHP warnings & eZ errors on Mysql 5.6 | Database related |
| EZP-21009 | Cannot redeclare class eZObjectForwarder in ezflow | |
| EZP-21032 | Rest spec missing info about is_logged_in cookie when explaining session based auth | Documentation, REST API v2 |
| EZP-21046 | DFS cluster: view cache is not expiring in one node | Clustering |
| EZP-21048 | Anchor link attribute is not transformed by xsl | Repository & Services (Public API impl) |
| EZP-21050 | Treemenu broken after EZPESU-2013-011 on IE7-8 | Administration Interface |
| EZP-21054 | Anchor tag is not transformed by xsl | Design (templates, CSS, etc.), Field types |
| EZP-21055 | creating content using API causes memory leaks | Caching, Repository & Services (Public API impl), SPI interfaces |
| EZP-21057 | contentService: Unable to delete a content with an empty file attribute | Field types, Legacy Storage engine |
| EZP-21058 | eZFind: don't fork in updatesearchindex script when using a single process | Extensions/eZ Find/Indexing |
| EZP-21060 | eZ Recommendation : Scenarios try to be loaded from ini files. | Extensions/eZ Recommendation |
| EZP-21063 | eZ Recommendation : Initial export script failed if pcntl extension is not install | Extensions/eZ Recommendation |
| EZP-21076 | recommendation: can not get twice recommendations for same node in same page (using different scenarios) | Extensions/eZ Recommendation |
| EZP-21077 | multiple recommendation tags do not work together in one template | Extensions/eZ Recommendation |
| EZP-21078 | output type for recommendations is not defineable | Extensions/eZ Recommendation |
| EZP-21088 | Publishing content with API doesn't trigger indexing correctly | Extensions/eZ Find, Repository & Services (Public API impl) |
| EZP-21089 | Creating an article with public api throw warning on xmltext in regards to relations | Field types, Public API interfaces |
| EZP-21094 | Successful POST /user/sessions doesn't have a Location header | REST API v2 |

| | | |
|-----------|---|--|
| EZP-21131 | Regression - %secret% key should be generated at install/update | Symfony stack |
| EZP-21138 | Deleted nodes remain in an eZ Flow block | Extensions/eZ Flow |
| EZP-21155 | DebugByUser is not working correctly in preview | Administration Interface |
| EZP-21156 | Class modification with a lot of cache to expire | Caching, Database related |
| EZP-21187 | Regressions on DemoBundle appearing with strict_variables=true | DemoBundle, Template language |
| EZP-21188 | "Notice: Undefined variable: response" triggered when viewing a content with ezobjectrelationlist | Symfony stack |
| EZP-21190 | installer fails at package validation using PHP 5.5 | |
| EZP-21219 | versionread policy not checked in ContentService::loadContent | Public API interfaces, Repository & Services (Public API impl), Users and Access control |
| EZP-21220 | Parsing error in REST with "Content-type: application/json; charset=utf-8" | REST interface |
| EZP-21222 | ezRecommendation exports fail when xml blocks include some special characters | Extensions/eZ Recommendation |
| EZP-21226 | ezchecktranslation.php is not handling translatorcomment & location nodes | Cronjobs |
| EZP-21227 | [Rest API] Copy content type will create copy identifier wrongly | REST API v2 |
| EZP-21233 | eZDBFileHandler (mysqli only) removed after eZP 5.0 | Documentation |
| EZP-21235 | API: user cannot have permissions to edit just himself, the limitation owner(self) is broken | Documentation, Public API interfaces |
| EZP-21237 | Debug by user feature blocks the login process | |
| EZP-21264 | The JS REST client does not support parallel requests | REST Client:JS |
| EZP-21274 | Update YUI & jQuery in ezsjscore | Extensions/eZ JSCore |
| EZP-21280 | tree_root setting ignored in link output from XMLText rendering | Symfony stack |
| EZP-21281 | Warning: Could not generate user hash ! Fallback to anonymous hash | Symfony stack |
| EZP-21284 | No url/href support in API XmlText input | Symfony stack |
| EZP-21289 | object_remote_id not handled in XmlText | Repository & Services (Public API impl) |
| EZP-21299 | REST Exceptions with code / previous arguments generate a 500 error | REST API v2 |
| EZP-21302 | Circular reference detected for service "ezpublish.urlalias_generator" | Symfony stack |
| EZP-21304 | REST api incorrectly parses requests with uri siteaccess | REST interface |
| EZP-21305 | Object name pattern doesn't support object relation datatype as first condition in a fallback | Field types |
| EZP-21325 | View parameters parsing transforms multiple slashes into one slash | Design (templates, CSS, etc.) |
| EZP-21330 | Documentation improvement: [HTTPHeaderSettings] | Documentation |
| EZP-21334 | Wrong XSLT rendering for some ezxml elements | Field types, Symfony stack |
| EZP-21336 | eZOE: Using IE8, every publish adds another empty paragraph at the end. | Extensions/eZ Online Editor |
| EZP-21343 | ContentStructureMenu cookie causes http request problems and breaks RFC 2965 | Administration Interface |
| EZP-21348 | eZOE: table width not saved in IE8 | Extensions/eZ Online Editor |
| EZP-21349 | Impossible to register one slot for multiple signals | Repository & Services (Public API impl), Symfony stack |
| EZP-21351 | Core compiler passes don't allow one service to use same tag with varying attributes | Symfony stack |
| EZP-21354 | Siteaccess part missing in generated symfony routes | |
| EZP-21358 | ezjscAjaxContent : Image's exif fields MakerNote and UserComment must be base64 encoded | Extensions/eZ JSCore, Extensions/eZ Online Editor |
| EZP-21365 | eZ Password Expiry support for users with main location outside "Users" | Extensions/eZ MB Password Expiry |
| EZP-21379 | Output filters (CSRF) result is lost when a custom layout is set for rendering legacy | Extensions/eZ Form Token |

module views

| | | |
|-----------|--|---|
| EZP-21388 | Object relation fails to be selected with eZ Find search | Administration Interface, Extensions/eZ Find, Legacy IO |
| EZP-21396 | Exif Warning in php 5.3.3 Rhel | |
| EZP-21400 | Discard draft, removes image file | Extensions/eZ Oracle Database |
| EZP-21408 | Use eZ Components from composer in standalone install | Legacy IO |
| EZP-21410 | object name limit does not support multibyte charset | Language |
| EZP-21413 | Documentation Update: Content\ViewProvider to be split for Content/Location | Documentation |
| EZP-21420 | PHPUnit tests fail when using Zeta Components from composer and testing eZ Publish legacy with an additional extension | Extensions, Legacy IO |
| EZP-21430 | [Admin Interface] Regression on preview (fatal error) | Administration Interface |
| EZP-21433 | embed-inline tags in xmltext fields are not rendered properly by core XSL | Design (templates, CSS, etc.), Legacy Storage engine, Symfony stack |
| EZP-21438 | Improve relation permission handling to use view_embed | Permissions |
| EZP-21443 | Debug log displayed when using long japanese strings in name | |
| EZP-21446 | Limit for object name trim adds +1 | |
| EZP-21465 | Cleanup extra lines in the ezurl_object_link table | |
| EZP-21467 | PHP Notice in ezurlaliasquery.php | |
| EZP-21469 | [API] language mask on ezcontentobject incorrectly set | Language |
| EZP-21471 | versionview: (JS) issues with class popup menu if object is not yet published | Design (templates, CSS, etc.) |
| EZP-21479 | error.log entries when loading DB schema from extensions | Extensions/eZ Demo, Install |
| EZP-21482 | Composer lock ICU version higher than the one on RH | Install, Symfony stack |
| EZP-21483 | [Wizard Setup] Install fails at the deploy with error on unserializeContentClassAttribute | Install |
| EZP-21498 | Check file consistency warns about ~ files | Administration Interface |
| EZP-21511 | Don't break prioritized languages when fetching eZURLAliasML->getPath in different locale | Language |
| EZP-21522 | Unable to publish an image content with the REST API | Content (images, XML, PDF, RSS, etc.), Field types, REST API v2 |
| EZP-21537 | [Demo Interface] My profile email appears with SPAMFILTER text | DemoBundle |
| EZP-21547 | HttpError for "Access denied" (1) is cached, returns "200 OK" instead | Misc |
| EZP-21548 | Clear role assignments cache when dealing with locations | Caching, Repository & Services (Public API impl) |
| EZP-21550 | Changing owner, clearing cache needed for Owner(Self) to work | Caching, Repository & Services (Public API impl) |
| EZP-21558 | DFS/MySQLi ezie error in copy with split DFS tables | Extensions/eZ Image Editor |
| EZP-21561 | eZ Publish 5.2alpha1 LS has a tones of JavaScript errors in admin interface | Administration Interface |
| EZP-21567 | Blank e-mail subject line with multi-byte characters (iconv_mime_encode: Unknown error) | Language, Notifications |
| EZP-21568 | Typo in REST\Server\Controller\Role | REST API v2 |
| EZP-21575 | Missing Legacy signal slot cache clearing on UpdateMetaData while updating user | Public API interfaces |
| EZP-21578 | Matching siteaccess on http header does not work | REST API v2, Symfony stack |
| EZP-21581 | content_view_provider.configured service uses wrong matcher factory | Symfony stack |
| EZP-21589 | Boolean values are serialized as string in JSON responses of the REST API | REST API v2 |
| EZP-21591 | Querystring lost in redirections | Misc |

| | | |
|-----------|---|---|
| EZP-21599 | Fix regression from EZP-19660 at a higher level | Workflows |
| EZP-21611 | unpublish cronjob uses anonymous credentials | Cronjobs |
| EZP-21612 | handleViewException response not returned in ViewController | Symfony stack |
| EZP-21613 | Compound\LogicalAnd serialization fails | Symfony stack |
| EZP-21621 | ContentView::setTemplateIdentifier throws InvalidArgumentTypeException even with the right type | Symfony stack |
| EZP-21628 | Symfony routes overriding URLAliases in admin | Symfony stack |
| EZP-21631 | RouteableFragmentRenderer::generateFragmentUri() not compatible with Symfony 2.3.5 | Symfony stack |
| EZP-21636 | Hinclude sub-requests are broken since EZP-21631 fix | Symfony stack |
| EZP-21648 | When publishing Content with Location some Location create struct properties are not respected | Legacy Storage engine, Public API interfaces, Repository & Services (Public API impl) |
| EZP-21656 | PSpell plugin fails with eZFormToken | Extensions/eZ Form Token, Extensions/eZ Online Editor |
| EZP-21668 | content.tree_root.location_id default value should not be null | Symfony stack |
| EZP-21684 | Bug when creating forward url alias | Symfony stack |
| EZP-21685 | [EZ Content Staging] Selection attribute fail in ContentStaging with value Zero | Extensions/eZ Content Staging |
| EZP-21689 | eZDemo navigation broken in a non virtualhost enviornment | DemoBundle |
| EZP-21695 | Cached ESI can not be shared among pages | Caching, Public API interfaces |
| EZP-21696 | addLimitation() new SubtreeLimitation fails with InvalidArgumentException | Public API interfaces |
| EZP-21700 | Search API returning duplicate content ids | Extensions/eZ Find, Public API interfaces |
| EZP-21703 | RoleService does not validate Limitations in assignRoleToUser() and assignRoleToUserGroup() methods | Repository & Services (Public API impl) |
| EZP-21705 | Wrong links generated when using Map\Host siteaccess matching | Symfony stack |
| EZP-21721 | Displaying an empty XMLText field outputs eZXML | Field types, Symfony stack |
| EZP-21722 | Error with the ez_render_field if a custom tag xsl stylesheet is not properly loaded | Field types, Symfony stack, Template language |
| EZP-21737 | Wrong scope in contentViewGenerateError when using DFS and user-permissions | Caching, Clustering, Permissions |
| EZP-21740 | Fix 5.2 upgrade doc | Documentation, Upgrading |
| EZP-21741 | Persistence cache not cleared on transaction rollback | Caching, SPI interfaces |
| EZP-21749 | Fatal error when editing content with ezimage | Content (images, XML, PDF, RSS, etc.), Database related |
| EZP-21758 | Custom variables are not correctly exposed in legacy templates when doing a sub-request | Symfony stack, Template language |
| EZP-21776 | Simple FieldValue Criterion handler does not escape value when used with CONTAINS operator | Legacy Storage engine, Search |
| EZP-21780 | Map\URI siteaccess matcher is greedy | Symfony stack |
| EZP-21786 | Using Page fieldtype, valid block items should be passed to the block templates | Field types, Symfony stack |
| EZP-21804 | Duplicate key in ezcontentobject_attribute when creating new draft with untranslatable field | Legacy Storage engine, Public API interfaces, Symfony stack |
| EZP-21817 | When updating Content untranslatable field is copied instead of updated | Legacy Storage engine |
| EZP-21818 | Translation ESL starts with newline | Language |
| EZP-21832 | New demo content needs permissions update for video content type used on landing page | DemoBundle |
| EZP-21845 | Trashed locations still in persistence cache & accessible in API | Caching, Repository & Services (Public API impl), SPI interfaces |
| EZP-21854 | Default ezgmaplocation_field template defines a wrong height | Field types |

| | | |
|-----------|---|--|
| EZP-21856 | Unable to run php composer.phar install | Symfony stack |
| EZP-21870 | Fatal error when deleting location with limited content/remove permissions | Permissions, Public API interfaces |
| EZP-21873 | Unable to use ez_render_field with ezgmaplocation_field | Symfony stack |
| EZP-21874 | ParentContentType Limitation does not work correctly with draft Content | Permissions |
| EZP-21876 | Compound matcher throws fatal error after patch from EZP-21834 | Symfony stack |
| EZP-21901 | DemoBundle: Convert all zone templates from legacy code to Twig | DemoBundle |
| EZP-21902 | As a BDD test writer I want behat running on updated demo content | Test framework |
| EZP-21904 | Fatal error after deleting the location of a single location object | Public API interfaces |
| EZP-21913 | Hotfix usage of global in cli scripts | |
| EZP-21914 | New stack DB link must be reset in asynchronous publishing daemon | Symfony stack |
| EZP-21917 | ezxml link class attribute not rendering because of wrong xsl | Content (images, XML, PDF, RSS, etc.) |
| EZP-21952 | user anonymous cannot be redefined | Symfony stack |
| EZP-22041 | Documentation: Update eZP 5.1 to 5.2 should be improved in config.yml example | Documentation, Upgrading |
| EZP-22056 | Doc: ContentStaging FAQ: object_id and node_id / Source vs Target | Extensions/eZ Content Staging |
| EZP-22180 | SPI: loading (reverse) relations does not check for published Content | Administration Interface, Caching, Public API interfaces |
| EZP-22195 | Memcache configuration issue | Symfony stack |
| EZP-22430 | Custom Location URL Alias not using redirect / 301 | |
| EZP-22456 | Roles and Policies assigned to parent user group not inherited | Permissions, Users and Access control |
| EZP-22471 | When loading resource in non-published version mainLocationId in ContentInfo is always null | Symfony stack |
| EZP-22505 | Basic auth does not work when extending REST API with eZ Publish 5.2 | REST API v2 |
