

# Step 1: Installation

## Install All The Things!

Well, at least the things required to run your chosen distribution:

### General installation guide for all eZ distributions

This installation guide can be followed with any eZ distribution based on the Symfony framework. Here's a list of available distributions from eZ:

Type	Archive	License	GIT / Composer
<b>eZ Platform</b> <i>"clean" distribution</i>	<a href="http://share.ez.no/downloads/downloads">share.ez.no/downloads/downloads</a>	GPLv2	<a href="#">ezsystems/ezplatform (INSTALL.md)</a>
<b>eZ Platform Demo</b> <i>Not for production use</i>	<i>Available via Git / Composer</i>	GPLv2	<a href="#">ezsystems/ezplatform-demo</a>
<b>eZ Platform Enterprise Edition</b> <i>"clean" distribution</i>	<a href="http://support.ez.no/Downloads">support.ez.no/Downloads</a>	BUL (Requires <b>eZ Enterprise</b> subscription)	<a href="#">ezsystems/ezstudio (INSTALL.md)</a>
<b>eZ Platform Enterprise Edition Demo</b> <i>Not for production use</i>	<a href="http://support.ez.no/Downloads">support.ez.no/Downloads</a>	BUL (Requires <b>eZ Enterprise</b> subscription)	<a href="#">ezsystems/ezstudio-demo</a>

## Choose Your Adventure!

Instructions vary depending on your desired operating system and method of installation. We recommend using Composer:
