

5.3.1 Release Notes

3rd June 2014

eZ announces the availability of 5.3.1, our first maintenance release available for all users of eZ Publish Platform 5.3 containing a notable few [updates and fixes](#).

Additional fix on Friday June 13th 2014 16:00 CET

updates.ez.no had a issue affecting composer.lock references to invalid eZ packages, this has now been [fixed](#) and re running the update command shown below and version the updated composer.lock should solve the problem.

Updating from a previous version of eZ Publish Platform 5.3

These instructions take advantage of the new [composer](#) powered update systems in 5.3 for maintenance updates, as for Upgrading from versions prior to 5.3 look at our [Upgrading from 5.1 to 5.3](#) or [Upgrading from 5.2 to 5.3](#) page.

Before you start, make sure you have Composer installed and familiarize yourself with the [Using Composer](#) page.

1. Updating Composer Packages selectively:

With this option you will only update the packages from eZ that have had updates after 5.3.0:

```
php -d memory_limit=-1 composer.phar update --no-dev --prefer-dist
ezsystems/ezpublish-kernel ezsystems/ezpublish-legacy ezsystems/ngsymfonytools-bundle
```

Note: If your using eZ Find, add "ezsystems/ezfind-ls" to the parameters to get latest version.

2. Updating Nginx configuration

If you're using Nginx as your webserver instead of Apache, then make sure to update [Nginx vhost configuration](#).

Package updates in this release

Here are the packages that have received an update as part of this release:

package	version
ezsystems/ezpublish-kernel	5.3.1
ezsystems/ezpublish-legacy	5.3.1
ezsystems/ezfind-ls	5.3.1
ezsystems/ngsymfonytools-bundle	1.0.4
