5.2 Changelog

This page shows changes since 5.1.

Stories:

Key	Summary	Component/s
EZP-18865	Separate DFS binary & cache tables and make it configurable	Caching, Legacy/Clustering
EZP-20039	Automate install steps in composer post install/update	CI System, Install
EZP-20071	HttpCache should Vary on the user hash	Platform stack, Users and Access control
EZP-20461	Finishing the implementation using Signal/Slot by enabling all Service integration tests	Search
EZP-20576	As a developer, I want to avoid writing my pagelayout twice by using my Twig template pagelayout for legacy actions	Legacy/Template language
EZP-20831	Properly handle path to images variants in REST responses	Content (images, XML, PDF, RSS, etc.), Platform/REST API v2
EZP-21019	Upgrade to Symfony 2.3	Platform stack
EZP-21133	POST /content/views has a wrong media-type	Platform/REST API v2
EZP-21168	Remove API InMemory (Stub) implementation and test suite	Test framework
EZP-21169	As a Tester I want BDD running on Travis	Test framework
EZP-21176	Prevent REST hrefs without prefix in payloads	Documentation, Platform/REST API v2
EZP-21178	Create documentation on how to listen to API signals	Platform stack, Platform/Repository & Services (Public API impl)
EZP-21180	Write documentation on context aware HTTP caching	Caching, Platform stack
EZP-21192	Symfony 2.3 : Implement interactive management of the parameters.yml file	Platform stack
EZP-21245	Make it easier to register eZXML custom tags in main XSL stylesheet	Field types
EZP-21323	Add link to older packages in setup wizard	Install
EZP-21461	As a user I want all country names to be translated in all languages	Content (images, XML, PDF, RSS, etc.)
EZP-21526	As a DemoBundle user I want to use disqus for commenting	DemoBundle
EZP-21531	As a user I need a way to pick correct Content name language	DemoBundle, Platform stack
EZP-21532	As a DemoBundle user I want Blog and blog_post to be displayed using symfony stack	DemoBundle, Platform stack
EZP-21654	DemoBundle: refactor top menu controller	DemoBundle
EZP-21657	DemoBundle: refactor latestContent action	DemoBundle
EZP-21676	As a developer, I want to access a field value in the current locale in a Twig template	Legacy/Template language, Platform stack
EZP-21677	As a developer, I want to always have access to root location	Legacy/Template language, Platform stack
EZP-21680	As a developer, I want to easily check if a Field is empty	Legacy/Template language, Platform stack, Platform/Repository & Services (Public API impl)
EZP-21723	As a developer, I want to use PagerFanta to do my pagination	DemoBundle, Platform stack
EZP-21743	As a DemoBundle user, I want the homepage to be displayed using full new stack	DemoBundle
EZP-21816	As a DemoBundle user, I want articles to be rendered with Twig templates	DemoBundle
EZP-21824	Update the 5.2 release notes	Documentation
EZP-21844	Write a cache cleanup script for the split DFS feature	Legacy/Clustering, Upgrading
EZP-21868	As a DemoBundle user, I want all frontpages to be implemented using Twig	DemoBundle

31 issues

Improvements:

EZP-15040 Support for more than 30 languages EZP-19120 5.x expose isEmptyValue() in API for template needs EZP-2018 Missing Language, Visibility & ObjectState Criteria EZP-2009 Expose SignalStot repository properly EZP-2009 Expose SignalStot repository properly EZP-20223 Implement missing integration tests for Repository EZP-20224 Implement missing integration tests for Repository EZP-20226 ez Recommendation - on-the-fly scenario loading EZP-20230 wold Symfony exception when file is missing for ezimage attribute EZP-20240 avoid Symfony exception when file is missing for ezimage attribute EZP-20240 avoid Symfony exception when file is missing for ezimage attribute EZP-20880 ContentStaging does not synchronize related objects EZP-20821 Make it possible to configure the front controller without editing it EZP-20829 Make the REST APILoader/Factory dynamic EZP-20829 Improve unit test execution time by changing Repo test to use EZP-20831 Improve unit test execution time by changing Repo test to use EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20859 FiledType integration tests need to be updated with tests for updating content on changing Content/Type EZP-20890 Write unit tests for createContent() and updateContent() methods in the Content/Service EZP-20979 Write integration tests need to be updated with tests for updating Content on changing Content() and updateContent() EZP-20979 Write integration tests for createContent() and updateContent() EZP-20979 Write integration tests for createContent() and updateContent() EZP-20979 Write integration tests for createContent() and updateContent() EZP-21081 Replace RMF Url management with Symfony's EZP-21095 Allow retrieving users by login & email through the User Service EZP-21095 Allow retrieving users by login & email through the User Service EZP-21095 Allow retrieving users by login & email through the User Service EZP-21095 Allow retrieving users by login & email through the User Service EZP-21095 Allow retrieving use	Key	Summary	Component/s
EZP-20018 Missing Language, Visibility & ObjectState Criteria Platform/RPI interfaces, Platform/Persistence/Legacy Storage engine, Platform/Repository & Services (Public API impl) EZP-20028 Implement missing integration tests for Repository Platform/Repository & Services (Public API impl) EZP-20218 Make it possible to use a custom controller to handle a content/flocation EZP-20438 Make it possible to use a custom controller to handle a content/flocation EZP-20502 avoid Symfony exception when file is missing for ezimage attribute EZP-20503 Content/Staging does not synchronize related objects EZP-20638 Content/Staging does not synchronize related objects EZP-20639 Make it possible to configure the front controller without editing it EZP-20821 Make it possible to configure the front controller without editing it EZP-20823 Make the REST APILoader/Factory dynamic EZP-20829 Make the REST APILoader/Factory dynamic EZP-20829 Make the REST APILoader/Factory dynamic EZP-20839 Move eZ Comments menu from top menu to left content menu Legacy/Extensions/ EZP Comments menu from top menu to left content menu Legacy/Administration Interface, Legacy/Extensions/eZ Comments EZP-20924 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing Content (type) EZP-20937 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-20937 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-21035 User can not be properly created from inside storage EZP-21035 User can not be properly created from inside storage EZP-21036 Add module_result in a LegacyResponse call EZP-21037 Platform/Repository & Services (Public API impl) methods in the ContentService EZP-21038 Add module_result in a LegacyResponse call EZP-21039 Add module_result in a LegacyResponse call EZP-21040 Add module_result in a LegacyResponse c	EZP-15040	Support for more than 30 languages	Language
EZP-20069 Expose SignalSlot repository properly EZP-20223 Implement missing integration tests for Repository EZP-20224 Implement missing integration tests for Repository EZP-20236 Implement missing integration tests for Repository EZP-20438 Make it possible to use a custom controller to handle a content/flocation EZP-20438 Make it possible to use a custom controller to handle a content/flocation EZP-20502 avoid Symfony exception when file is missing for ezimage attribute EZP-20503 Content/Staging does not synchronize related objects EZP-20638 Content/Staging does not synchronize related objects EZP-20821 Make it possible to configure the front controller without editing it EZP-20821 Make the REST APILoader/Factory dynamic EZP-20821 Make the REST APILoader/Factory dynamic EZP-20823 Improve unit test execution time by changing Repo test to use API/Setup/Factory approach EZP-20839 Move eZ Comments menu from top menu to left content menu EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20920 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content/Open EZP-20937 Write integration tests need to be updated with tests for updating Content (images, XML, PDF, RSS, etc.) EZP-209379 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-20939 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-210136 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) methods in the ContentService EZP-21034 Add module_result in a LegacyResponse call Platform/Repository & Services (Public API impl) Platform/Repository & Services (Publ	EZP-19120	5.x expose isEmptyValue() in API for template needs	Database related, Misc
EZP-20223 Implement missing integration tests for Repository EZP-202261 eZ Recommendation - on-the-fly scenario loading EZP-20438 Make it possible to use a custom controller to handle a content/location EZP-20438 Make it possible to use a custom controller to handle a content/location EZP-20502 avoid Symfony exception when file is missing for ezimage attribute EZP-20503 Content Staging does not synchronize related objects EZP-20638 ContentStaging does not synchronize related objects EZP-20821 Make it possible to configure the front controller without editing it EZP-20823 Make the REST APILoader/Factory dynamic EZP-20829 Make the REST APILoader/Factory dynamic EZP-20839 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20820 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting EZP-20979 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write unit tests for createContent() and updateContent() EZP-20979 Write integration tests for createContent() and updateContent() Platform/Repository & Services (Public API impl) methods in the ContentService EZP-21018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-21018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-21084 Add module_result in a LegacyResponse call Platform/Repository & Services (Public API impl) EZP-21095 Add module_result in a LegacyResponse call Platform/Repository & Services (Public API impl) EZP-21096 Add module_result in a LegacyResponse call Platform/API interfaces, Platform/Repository & Services (Public API impl) EZP	EZP-20018	Missing Language, Visibility & ObjectState Criteria	
EZP-20261 eZ Recommendation - on-the-fly scenario loading Legacy/Extensions/eZ Recommendation EZP-20438 Make it possible to use a custom controller to handle a content/location EZP-20502 avoid Symfony exception when file is missing for ezimage attribute \$5.xt.egacy (O. Content (images, XML, PDF, RSS, etc.), Platform/Repositor, & Services (Public API impl) EZP-20638 Content/Staging does not synchronize related objects Legacy/Extensions, Legacy/Extensions/eZ Content Staging EZP-20821 Make it possible to configure the front controller without editing it EZP-20829 Make the REST APILoader/Factory dynamic Platform/REST API v2 EZP-20837 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu Legacy/Administration Interface, Legacy/Extensions/eZ Comments EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting Legacy/Administration Interface EZP-20970 Write unit tests for createContent() and updateContent() methods in the Content/Service EZP-20979 Write integration tests for createContent() and updateContent() Platform/Repository & Services (Public API impl) EZP-2018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-2019 Write integration tests for createContent() and updateContent() Platform/Repository & Services (Public API impl) EZP-21018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-21018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-21029 Write unit easily to create from inside storage Platform/Persistence/Legacy Storage engine EZP-21030 User can not be properly created from inside storage Platform/API interfaces, Platform/Repository & Services (Public API imp	EZP-20069	Expose SignalSlot repository properly	Platform stack, Platform/Repository & Services (Public API impl)
EZP-20438 Make it possible to use a custom controller to handle a content/location EZP-20502 avoid Symfony exception when file is missing for ezimage attribute EZP-20638 Content/Staging does not synchronize related objects EZP-20638 Content/Staging does not synchronize related objects EZP-20821 Make it possible to configure the front controller without editing it EZP-20829 Make the REST APILoaden/Factory dynamic EZP-20839 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20922 Add event listener to kernel/content/download.plp EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing Content/Type EZP-20937 Write unit tests for createContent/) and updateContent() methods in the Content/Service EZP-20978 Write integration tests for createContent() and updateContent() methods in the Content/Service EZP-20979 Write integration tests for createContent() and updateContent() methods in the Content/Service EZP-21018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-21035 User can not be properly created from inside storage Platform/Repository & Services (Public API impl) EZP-21040 Add module_result in a LegacyResponse call Platform/Repository & Services (Public API impl) EZP-21050 Allow retrieving users by login & email through the User Service EZP-21040 unpublish cronjob calls activateextensions() while this is already	EZP-20223	Implement missing integration tests for Repository	Platform/Repository & Services (Public API impl)
EZP-20932 avoid Symfony exception when file is missing for ezimage attribute EZP-20638 ContentStaging does not synchronize related objects EZP-20821 Make it possible to configure the front controller without editing it EZP-20829 Make the REST APILoadenFactory dynamic EZP-20837 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20938 Move eZ Comments menu from top menu to left content menu EZP-20949 Move eZ Comments menu from top menu to left content menu EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FileIdType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting EZP-20978 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-20108 Replace RMF Url management with Symfony's EZP-21018 Replace RMF Url management with Symfony's EZP-21036 Varie can not be properly created from inside storage EZP-21056 Allow retrieving users by login & email through the User Service EZP-21057 Platform/Repository & Services (Public API impl) EZP-21058 Allow retrieving users by login & email through the User Service EZP-21059 Allow retrieving users by login & email through the User Service EZP-21050 User can not be properly created from inside storage EZP-21050 Allow retrieving users by login & email through the User Service EZP-21050 Varie unit lessed on the run legacy pagelayout when using an eZ5 one EZP-21240 unpublish cronjob calls activateextensions() while this is already	EZP-20261	eZ Recommendation - on-the-fly scenario loading	Legacy/Extensions/eZ Recommendation
& Services (Public API impl) EZP-20638 ContentStaging does not synchronize related objects Legacy/Extensions, Legacy/Extensions/eZ Content Staging EZP-20821 Make it possible to configure the front controller without editing it EZP-20829 Make the REST APILoaden/Factory dynamic Platform/REST API v2 EZP-20837 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu Legacy/Administration Interface, Legacy/Extensions/eZ Comments EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting Legacy/Administration Interface EZP-20978 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() EZP-20108 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) EZP-21018 Replace RMF Url management with Symfony's Platform/REST API v2 EZP-21035 User can not be properly created from inside storage Platform/Persistence/Legacy Storage engine EZP-21064 Add module_result in a LegacyResponse call Platform stack EZP-21095 Allow retrieving users by login & email through the User Service Platform/API interfaces, Platform/Repository & Services (Public API impl) EZP-21143 performance: do not run legacy pagelayout when using an eZ5 one EZP-21240 unpublish cronjob calls activateextensions() while this is already	EZP-20438	•	Caching, Legacy/Template language, Platform stack
EZP-20821 Make it possible to configure the front controller without editing it EZP-20829 Make the REST APILoader\Factory dynamic Platform\REST API v2 EZP-20837 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu Legacy/Administration Interface, Legacy/Extensions/eZ Comments EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting Legacy/Administration Interface EZP-20978 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() methods in the ContentService EZP-21018 Replace RMF Url management with Symfony's Platform/Repository & Services (Public API impl) methods in the ContentService EZP-21035 User can not be properly created from inside storage Platform/Persistence/Legacy Storage engine EZP-21084 Add module_result in a LegacyResponse call Platform/Persistence/Legacy Storage engine EZP-21095 Allow retrieving users by login & email through the User Service Platform/API interfaces, Platform/Repository & Services (Public API impl) EZP-21143 performance: do not run legacy pagelayout when using an eZ5 one EZP-21240 unpublish cronjob calls activateextensions() while this is already	EZP-20502	avoid Symfony exception when file is missing for ezimage attribute	5.x/Legacy IO, Content (images, XML, PDF, RSS, etc.), Platform/Repository & Services (Public API impl)
EZP-20829 Make the REST APILoaden/Factory dynamic Platform/REST API v2 EZP-20837 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu Legacy/Administration Interface, Legacy/Extensions/eZ Comments EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting Legacy/Administration Interface EZP-20978 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() Platform/Repository & Services (Public API impl) EZP-21018 Replace RMF Url management with Symfony's Platform/REST API v2 EZP-21035 User can not be properly created from inside storage Platform/Persistence/Legacy Storage engine EZP-21046 Add module_result in a LegacyResponse call Platform stack EZP-21056 Allow retrieving users by login & email through the User Service EZP-21143 performance: do not run legacy pagelayout when using an eZ5 one EZP-21240 unpublish cronjob calls activateextensions() while this is already	EZP-20638	ContentStaging does not synchronize related objects	Legacy/Extensions, Legacy/Extensions/eZ Content Staging
EZP-20837 Improve unit test execution time by changing Repo test to use API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting EZP-20978 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() Platform/Repository & Services (Public API impl) methods in the ContentService EZP-21018 Replace RMF Url management with Symfony's EZP-21035 User can not be properly created from inside storage EZP-21044 Add module_result in a LegacyResponse call EZP-21055 Allow retrieving users by login & email through the User Service EZP-21040 Interfaces, Platform/Repository & Services (Public API impl) EZP-21143 performance: do not run legacy pagelayout when using an eZ5 one EZP-21240 unpublish cronjob calls activateextensions() while this is already	EZP-20821	Make it possible to configure the front controller without editing it	
API/SetupFactory approach EZP-20849 Move eZ Comments menu from top menu to left content menu EZP-20922 Add event listener to kernel/content/download.php Content (images, XML, PDF, RSS, etc.) EZP-20936 FieldType integration tests need to be updated with tests for updating Content on changing ContentType EZP-20959 Add admin.ini LeftMenu Enabled setting EZP-20978 Write unit tests for createContent() and updateContent() methods in the ContentService EZP-20979 Write integration tests for createContent() and updateContent() EZP-21018 Replace RMF Url management with Symfony's EZP-21035 User can not be properly created from inside storage EZP-21044 Add module_result in a LegacyResponse call EZP-21055 Allow retrieving users by login & email through the User Service EZP-21143 performance: do not run legacy pagelayout when using an eZ5 one EZP-21240 unpublish cronjob calls activateextensions() while this is already	EZP-20829	Make the REST APILoader\Factory dynamic	Platform/REST API v2
