Requirements 5.1

[Reference platforms] [Supported non-reference stacks (approved)] [Compatible platforms] [Supported browsers]

eZ Publish 5.1 is built to rely on existing technologies and standards, mainly:

- · PHP scripting language
- SQL database
- Java JRE when eZ Find search engine is used

To answer the question "Is my platform supported by eZ Publish?", several things must be taken into consideration. The following tables gives you the details of the platform requirements for the latest eZ Publish release.

Reference platforms

The most safe and optimized stack for eZ Publish Platform. The stack is supported and certified for eZ Publish Platform 5.1. This means that our QA certification team has successfully run intensive certification tests on the platform, and that we can fully support the platform in the scope of an eZ Publish Subscription.

The reference stack for eZ Publish Platform 5.1 is based on Red Hat Enterprise Linux 6. The detail of the stack can be seen in the table below.

Stack	Single mode & Cluster mode
os	RedHat RHEL 6.x
Web Server	Apache 2.2.15 (pre-fork mode) (rhel6 package)
DBMS	MySQL 5.1.61 (rhel62 packages)
PHP (mod_php) + PHP CLI	 Official PHP 5.3.3 (rhel62 packages) Official PHP 5.4.x
PHP + PHP CLI extensions	APC 3.1.9 (external pecl extension) bz2 curl dom exif fileinfo ftp gd iconv json mbstring memcache (only needed for cluster mode) mysqli pcntl pcre pdo-mysql posix reflection simplexml spl ssl xmlreader zlib xml libxml xsl
Graphic Handler	ImageMagick 6.5.4.7
Other	 OpenOffice 3.2.1-19 Java JRE 1.6 or higher (Oracle-Sun/OpenJDK) when eZ Find search engine is used

Cluster mode	 eZDFSFileHandler (mysqli) + Linux NFS Persistence cache configured with Memcache HTTP cache configured to use Varnish
File system	Linux ext4

Supported non-reference stacks (approved)

These stacks are also tested, but not as extensively as our reference stacks. These stacks still benefit from the full support and maintenance guarantees provided with the eZ Publish Platform Subscription, but more issues might occur during normal operations, performance might be lower and issues take longer to resolve.

The supported non-reference stacks for eZ Publish Platform 5.1 are:

- SUSE Linux Enterprise Server 11 SP2(**)
- Debian 6

The detail of the stacks can be seen in the table below.

	Single Mode	Cluster Mode
Operating system	 Debian 6 SUSE Linux Enterprise Server (SLES) 11 SP2(**) 	 Debian 6 SUSE Linux Enterprise Server (SLES) 11 SP2(**)
Web Server	Apache 2.2.x (prefork mode)	Apache 2.2.x (prefork mode)
DBMS	 MySQL 5.0.x or 5.1.x PostgreSQL 8.4 	• MySQL 5.0.x or 5.1.x
PHP (mod_php) + PHP CLI + apache	PHP 5.3.xPHP 5.4.x	PHP 5.3.xPHP 5.4.x

Cluster mode		 eZDFSFileHandler (mysqli) + Linux NFS Persistence cache configured with Memcache[d] HTTP cache configured to use Varnish

^{**} Issues have been identified with the SLES 11 SP2 in regards of the PHP stack. eZ Systems can not provide a workaround and the only recommendation is to wait for a new service pack for SLES.

Compatible platforms

eZ Publish can run and execute on many more platforms than the ones listed above, including (but not limited to) the following operating systems if they pass the Symfony requirements:

- Solaris
- Opensolaris
- Windows 2000/XP/Vista/7/2008 (only on legacy stack or legacy mode)
- Mac OSX server

However, eZ Systems doesn't insure and guarantee quality operation of an eZ Publish Platform installation if it is running on any platform not listed as supported. eZ Publish Enterprise Subscriptions are still available for compatible platforms, but the guarantee and the product support will not apply and although you will receive various maintenance releases and services, no bug fix guarantee will apply to issues related to the platform. Maintenance and monitoring tools will not be available. eZ Systems does not advise merely compatible platforms for production use.

Supported browsers

eZ Publish is developed to work properly and support the following browser configurations for administrator users:

- Firefox: Latest stable version. Tested on Firefox 16.
- Google Chrome: Latest stable version. Tested on Chrome 21"
- Internet Explorer: 8 & 9. Tested on IE 9
- Safari: 6. Tested on Safari 6.0 on Mac OSX 10.8

Please note that the interface will display and behave optimally in any browser that supports HTML 5.0, CSS 3.0 and ECMAScript 5. If these technologies are not supported the system will gracefully appear with simpler design/layout but will still be accessible through standard/default HTML elements.
