5.3.3 Release Notes

17th October 2014

eZ announces the availability of 5.3.3, a maintenance release available for all users of eZ Publish Platform 5.3 containing a notable few updates and fixes.

Worth mentioning in this release are some improvements/fixes to: Repository API performance, IO performance, formtoken exceptions, preview functionality, asynchronous publishing, content staging, image & image alias handling, lazy sessions, and some ESI/hinclude request failing because the way SiteAccess info was serialized.

- Updating from a previous version of eZ Publish Platform 5.3
 - 1. Patch your composer.json file
 - 2. Updating Nginx configuration
 - 3. Updating Composer Packages selectively
 - 4. Update the database
- Package updates
- · Updates and fixes in this release

Updating from a previous version of eZ Publish Platform 5.3

These instructions take advantage of the new Composer powered update systems in 5.3 for maintenance updates, so make sure you familiarize yourself with the Using Composer page.

For Upgrading from versions prior to 5.3 look at our Upgrading from 5.1 to 5.3 or Upgrading from 5.2 to 5.3 page.

1. Patch your composer.json file

Issues with Zeta Components and Composer have been fixed so you should edit composer.json and remove any line with "zetacomponents/" like illustrated in diff below:

/composer.json diff diff --git a/composer.json b/composer.json index 3c4fdle..ffel8af 100644 --- a/composer.json +++ b/composer.json @@ -37,25 +37,6 @@"egulias/listeners-debug-command-bundle": "~1.9", "white-october/pagerfanta-bundle": "1.0.*", "nelmio/cors-bundle": "~1.3", "zetacomponents/archive": "@dev", "zetacomponents/authentication": "@dev", "zetacomponents/authentication-database-tiein": "@dev", "zetacomponents/base": "@dev", "zetacomponents/cache": "@dev", "zetacomponents/configuration": "@dev", "zetacomponents/console-tools": "@dev", "zetacomponents/database": "@dev", "zetacomponents/debug": "@dev", "zetacomponents/event-log": "@dev", "zetacomponents/feed": "@dev", "zetacomponents/image-conversion": "@dev", "zetacomponents/mail": "@dev", "zetacomponents/mvc-tools": "@dev", "zetacomponents/mvc-authentication-tiein": "@dev", "zetacomponents/persistent-object": "@dev", "zetacomponents/php-generator": "@dev", "zetacomponents/signal-slot": "@dev", "zetacomponents/system-information": "@dev", "hautelook/templated-uri-bundle": "~1.0", "doctrine/doctrine-bundle": "1.2.*" },

2. Updating Nginx configuration

If you're using Nginx as your webserver instead of Apache, then make sure to update Nginx vhost configuration, changes since 5.3.0: 5.3.1, 5.3.3

3. Updating Composer Packages selectively

With this command you'll only update packages from eZ (and Symfony) that have received updates since 5.3.0:

```
php -d memory_limit=-1 composer.phar update --no-dev --prefer-dist
ezsystems/ezpublish-kernel ezsystems/ezflow-ls-extension ezsystems/demobundle
ezsystems/comments-bundle ezsystems/ngsymfonytools-bundle ezsystems/ezpublish-legacy
symfony/symfony
```

Note: Add "ezsystems/ezfind-ls", "ezsystems/ezcontentstaging-ls" and/or "ezsystems/ezsurvey-ls" to the parameters to get latest version if you also use these extensions.

4. Update the database

Import to your database the changes provided in:

And if you use Cluster (DFS) the following:

/<ezp5-root>/ezpublish_legacy/update/database/mysql/5.3/dbupdate-cluster-5.3.2-to-5.3.3.sql

Package updates

Here are the packages that have received an update as part of this releases:

| package | version | prior version |
|-------------------------------|---------|---------------|
| ezsystems/ezpublish-kernel | 5.3.3 | 5.3.2[.3] |
| ezsystems/ezpublish-legacy | 5.3.3 | 5.3.2[.1] |
| ezsystems/ezcontentstaging-ls | 5.3.3 | 5.3.2 |
| ezsystems/ezflow-ls-extension | 5.3.3 | 5.3.2 |
| ezsystems/ezfind-ls | 5.3.3 | 5.3.2 |
| ezsystems/ezsurvey-ls | 5.3.3 | 5.3.1 |

Other packages that have received update since 5.3.0:

| package | version |
|---------------------------------|----------|
| ezsystems/comments-bundle | 5.3.2 |
| ezsystems/demobundle | 5.3.2 |
| ezsystems/ngsymfonytools-bundle | 1.0.5 |
| symfony/symfony | >=2.3.19 |

Updates and fixes in this release

| Key | Summary | Component/s |
|-----------|--|---|
| EZP-22191 | As a User I expect API's with language filters to respect Always available flag | Language, Legacy Storage engine, Symfony stack |
| EZP-23116 | Change SPI Content Search Handler to return ContentInfo | Repository & Services (Public API impl), Search |
| EZP-22995 | Disable ezformtoken for lowlevel legacy fallbacks | Extensions/eZ Form Token, Symfony stack |
| EZP-23263 | Allow setting section and state during creation of new object | Administration Interface |
| EZP-23296 | Template Block Cache has cache key collisions | Caching |
| EZP-23333 | Improve Content object build speed using SPI Cache | Repository & Services (Public API impl) |
| EZP-23355 | Add a getter for wrappedUser property in UserWrapper | |
| EZP-21825 | Temporary files not always deleted when copying from DFS to FS | Clustering |
| EZP-22974 | When I create a new Image I get Error: eZDir::recursiveDelete | Caching, Misc |
| EZP-23019 | Date and Time attribute displays 1st january 1970 when no date is set | Administration Interface, Legacy Storage engine |
| EZP-23066 | Errors when/after trashing content with empty image | Legacy Storage engine |
| EZP-23080 | Updating an image through API fails when using DFS | Repository & Services (Public API impl) |
| EZP-23086 | Image thumbnail not shown on backend if alias contains quotes | |
| EZP-23121 | 5.2 Role Service API allows duplicate assignments with subtree limitations to user group | Public API interfaces |

| EZP-23142 API Signals are not transaction safe EZP-23140 When I step through the solup wicard I get Error aZDir-recursiveDelate EZP-23152 delete/vention removes images from published vension EZP-23168 ESI or Hindude request URLs can exceed acceptable size of BKB EZP-23170 "exap note" function can ewap container and non-container nodes (invalid EZP-23170 task) EZP-23170 Exp node function can ewap container and non-container nodes (invalid EZP-23170 task) EZP-23170 Exp node function can ewap container and non-container nodes (invalid EZP-23170 task) EZP-23170 Exp node function can ewap container and non-container quotes EZP-23170 task passions are not honored in 6.3 Synthory stack. Users and Access control EZP-23170 task passions are not honored in 6.3 Synthory stack.
