Looking for 4.x documentation ?
You will find the 4.x documentation in the legacy part of the documentation.

What is eZ Publish?

eZ Publish an highly-extensible Enterprise Open-Source Content Management System/Framework, based on the Symfony2 framework starting version 5.0. In its default Enterprise offering, eZ Publish Platform, it is extended to provide full CXM capabilities, bundled with support services, provided as a LTS release with first access to security updates and regular fully tested maintenance releases.
