Customization possibilities

Overview

eZ offers you many ways in which you can adapt your installation and your website to your needs. This means both creating and fine-tuning your content model and customizing the layout and visual aspect of your website.

Some more advanced levels of customization require programming knowledge.

The following parts of eZ can be adapted and modified:

What	How	Who	Documentation
Content Types	Modify existing Content Types and add new ones.	User with access to Admin Panel	Creating and managing Content Types
Field Types	Add new Field Types.	User with PHP knowledge	Creating a Tweet Field Type
Landing Page layouts	Modify existing layouts and add new ones.	User with PHP knowledge	Creating Landing Page layouts (Enterprise)
Landing Page blocks	Add new blocks for Landing Page.	User with PHP knowledge	Creating Landing Page blocks (Enterprise)
Templates	Create new templates for the website.	User with Twig knowledge	Design
System	Customize installation by extending the system (for example create new tabs in Platform UI)	User with HTML5/CSS/JavaScript knowledge and basic knowledge of Symfony	Extending eZ Platform
