### Updates and fixes in this release

Below is a list of notable bugs/features/enhancements done in the release.

- [EZP-25533] - Hardcoded anonymous_hash in FosHttpCache mismatches what is generated by Platform
- [EZP-25913] - urlAliasGenerator::generate issues in console command / cli
- [EZP-26042] - Some mandatory parameters are missing ("language") to generate a URL for route "_ez_content_view"
- [EZP-26117] - Required richtext not validated as filled with single embed
- [EZP-26125] - Missing language parameter when generating _ez_content_view  route
- [EZP-26130] - Search for content in many location hangs UI
- [EZP-26141] - Search API appears to conduct some form of 'OR' search not an 'AND' search
- [EZP-26145] - Unable to undo in the RichText editor
- [EZP-26149] - Slashes in view parameters cause php notice
- [EZP-26292] - Can't edit Landing Page after changing default layout zone Id
