Extending eZ Publish 5

Documentation on how to extend the functionality of eZ Publish 5. For basic development concepts and techniques, see Developing with eZ Publish 5.

- Content and Location view providers
- Cross-Origin HTTP requests
- Field Type API and best practices
    - FieldType template
    - Register FieldType
    - Settings schema and allowed validators
- Parameters injection in content views
- RouteReference
- Search Criteria and Sort Clauses
- Signal-Slot
- SPI and API repositories

How to create additional:

- Criteria
- SortClauses
- Permission Limitations
- SPI implementations
    - Persistence
    - IO
    - ..
- Field types

More to come on the topic "Developing eZ Publish":

- (API's)
- (Repository API Services)
- (SPI Persistence Handlers)
