- Download:
    - As Customer with eZ Enterprise subscription: https://support.ez.no/Downloads (*BUL* License)
    - As Partner with Test & Trial software access: https://support.ez.no/Downloads (*TTL* License)
    - If none of the above, request a demo instance: http://ez.no/Forms/HTML-forms/Discover-eZ-Studio
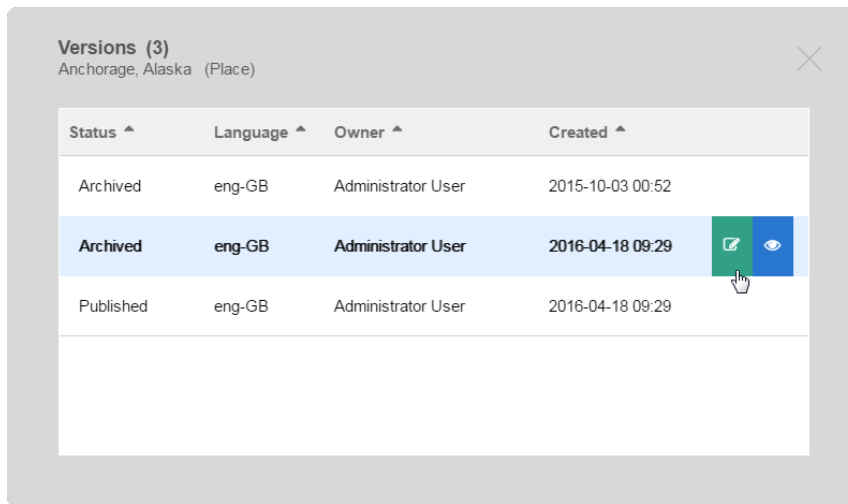

Changes since 16.02

Summary of changes

- Included a mechanism for migrating legacy Flow content to eZ Studio Landing Pages. See Migrating legacy Page field (ezflow) to Landing Page (Enterprise).
- You can now preview and edit previous versions of content in Page mode.

    In Page mode a new Versions button in available in the Studio toolbar. Click it to view a list of all versions of the current Content item.

    When you point to a Content item in the list, two icons appear. You can choose to view a selected version, or to edit in:

- Visual change to studio toolbar: addition of a Version button and an Options menu

  The Options menu allows you to copy the URL of the current Content item, and to send the item to Trash:

- You can now send content to Trash directly from Page mode.

  Use the new Options menu to send a Content item to trash. You then need to go to Content mode to view and manage items in Trash.

- When installing, you can now choose Studio with demo content, or a clean installation.

  The main meta repository has been split in two: **ezstudio** with clean installer and **ezstudio-demo** with demo content. See the Updating eZ Platform guide to learn how to select the repository to update to.

Full list of improvements

Key	Summary	T
EZS-679	Xsd Validation for XML files	↗
EZS-668	Studio static layout shouldn't have hardcoded base template	☑
